Excellent presentation, great ideas
Excellent session. Worth my time and attention
Excellent webinar: far superior to most that I have endured.
Exceptional webinar! All was useful and engaging!
Good presentation, but I do 95% of what he described but I learned 1 new thing so it was worth it
Great webinar
I expected this to be more about how to use technology in presentations, and how to manage time, of course, but it was so much more than that. So many useful ideas set out in ways that help me remember them and imagine myself using them.
I was very pleasantly surprised that a lot of my presentation habits were already recommended by Tom. I just hadn't really given them names or any sort of metacognitive thought on what was working, so this helped in identifying those ideas. And thanks again for staying on time.

The presentation was great, but getting onto the webinar was much more difficult than it should be.

The presenter provided perfect examples of content included in webinar Thank you!

This is the BEST and most engaging webinar that I have attended in my professional career. It was filled with relevant information and ways to incorporate it. Many webinars are filled with research and great initiatives but they do not provide information on how to implement it.

This presentation was actually fun and interactive. Within the first few seconds as I was thinking "it's about to start," I was dreading the next hour, but to my surprise it went by fast and I enjoyed it. I also took away some really important information that I will be incorporating into future presentations.

This was great.

This webinar was engaging and informative. Thank you very much

Time well spent. Thank you!

Very helpful tips for planning presentations in the near future.
