What are your general comments about this session?

- Dr. Tobin was a great speaker. It was nice to see him model “universal” teaching after doing some other UDL workshops previously.
- Dr. Tobin’s presentations offer useful tips and he models UDL techniques. He has an engaging style that makes me want to learn more.
- Excellent Presentation
- Excellent presentation, very useful information
- Good Info.
- Great ideas shared and learnt for student engagement
- Great information
- Great Information
- Great information about ways to help the students during COVID.
- I understand that he is trying to demonstrate what an ADA compliant course might look like. It was painfully slow and could have been covered in half the time.
- I was especially impressed with Dr. Tobin’s pre-conference research about CCC and using our sites in his photos. He was a perfect presenter for today and these times! He also modeled what he talked about.
- I will integrate my learners Mt from this to my online and F2F classes. Helpful.
- Not a lot of new information, but it was pleasant enough.
- Presenter did not address obstacles specific to asynchronous course delivery.
- Speaker was very engaging. Enjoyed his knowledge, creativity and “alternative” suggestions!
- The keynote speaker was terrific. The format was really good, and it was well paced.
- These are basic and important foundations of online teaching.
- Very clear and timely. Very informative.
- Very informative.
- Very informative and engaging. Thomas Tobin was one of the best keynotes I have seen. He seamlessly demonstrated the concepts he was talking about by maintaining a consistent and active presence in the chat. He also respectfully redirected people back to the task at hand.
- Was clear, was basic and a repeat.
