

25th April 2022

To whom it may concern,

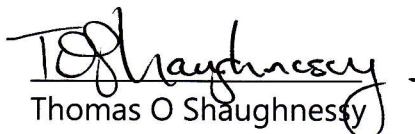

We are writing a testimonial letter on behalf of Dr Thomas Tobin who delivered a series of three webinars on Implementing Universal Design or Learning (UDL) to staff and students at the University of Limerick between January and April, 2022.

Dr. Tobin's demeanour and candour throughout our engagement was of the highest quality. A consummate professional, Dr. Tobin delivered three fantastic webinars that were extremely well received within our institution. Compassionate, articulate and inclusive Thomas provided a professional series that was thought-provoking and practical, addressing all the key points agreed upon in our preliminary meetings. Moreover, we found Dr. Tobin's natural openness facilitated real engagement and encouraged scholarly debate amongst colleagues within our university. His ability to engage with everyone, from students to senior management was extremely impressive and it has already helped foster valuable dialogue and influence practice.

It would be our pleasure to recommend Dr Tobin to other educational bodies. We found the overall experience of working alongside him to be extremely valuable, enlightening, and thoroughly enjoyable. If you have any queries or questions related to the above comments, please feel free to contact us directly.

Kind Regards

UDL Project Team, University of Limerick
