

Create a more
effective system
for evaluating online
faculty

Thomas J. Tobin

B. Jean Mandernach | Ann H. Taylor

Evaluating Online Teaching is the first comprehensive book to outline strategies for effectively measuring the quality of online teaching, providing the tools and guidance that faculty members and administrators need in order to improve teaching and learning, student success, and institutional results. The authors address challenges that colleges and universities face in creating effective online teacher evaluations, including organizational structure, institutional governance, faculty and administrator attitudes, and possible budget constraints.

Readers gain access to rubrics, forms, and worksheets that they can customize to fit the needs of their unique institutions and come to understand the online teaching evaluation life cycle.

EVALUATING ONLINE TEACHING

Implementing
BEST PRACTICES

A Wiley Brand

"This is the most informed, perceptive, and sensible book I've seen on the subject of evaluating online teaching. It should be required reading for both professors who teach online and those who evaluate their performance."

—Peter Seldin, Distinguished Professor
of Management, Pace University,
and author of *The Teaching Portfolio*
